Products:

A. Sampaio is a market leader in the manufacture of circular knitting. With 76 years of experience, it is of utmost importance to rely on the values it esteems the most - Innovation, Sustainability, Trust and Transparency.

Our company has a strong position in several fields of activity, which we identify in our product ranges. The Sport Active fabric range is essential in the company's portfolio, and continuous innovation is its driving force. Through our partnership with customers, fibre producers and special finishing development companies, we have placed our company in a position where it prides itself on being the first to bring the latest developments in textiles to the sports market. We offer groundbreaking solutions for every physical activity. We showcase knits with high performance, comfort, and protection levels in this range of products without neglecting their aesthetics. We have state-of-the-art engineered fabrics within this range with the best technological solutions for each end-use, firmly committed to environmental practices.

Certifications:

- ISO 9001 – TÜV (Certificate No. 20100233016125)
- OEKO-TEX Standard 100 (Class I and II)
- OEKO-TEX STeP (Level 3)
- GOTS (00142319)
- GRS (TE-00142319)
- RWS (CTV-920030)
- Higg Index (FEM – Facility Environmental Module; FSLM – Facility Social and Labour Module) certified by ELEVATE.
- We're proud to work with members of the 'Better Cotton Initiative / BCI' (ID Number: 1005114-1)

TMG Textiles / GPSA . A08

Contact: Hélder Rosendo

E-mail: helder.rosendo@tmg.pt

Website: www.tmg.pt

Products: TMG's focus is to be the industrial partner of our clients, promoting unique competitive advantages reinforced by talent and knowledge leading to the design of products that stand out for their technical and aesthetic characteristics. We are here to innovate and deliver solutions for our partners to empower their success. We strive to minimize the environmental footprint of our operations and want to impact the planet positively. With a high focus on technological advancement in the textile industry, we provide our customers with digital fabric solutions and 3D rendering, which eliminates time-consuming intermediate prototyping steps. With a development hub made up of technical and creative teams, our emphasis is increasingly focused on special products and projects, with enlarged performance and high technicality, combining emerging raw materials and differentiating functional finishes, mainly aimed at workwear, corporate, sportswear, and athleisure.
